Riverbend Day-Use Area and Disc Golf Course

Length: 27 holes
Tee pads: concrete

Players love this 27-hole course, and rightly so. Home of the Beaver State Fling, a Professional Disc Golf Association (PDGA) tournament, the course offers a healthy mix of difficulty for both amateurs and professionals.

This inset map provides a detailed view of the Riverbend Day-Use Area and Disc Golf Course. It shows the layout of the 27 holes, with amateur tees in purple and pro tees in blue. The map includes a legend for disc golf symbols: Amateur Tee, Pro Tee, Pin, Restroom, Parking, Hiking Trail, Boat Ramp, Picnic Shelter, and Picnic. A scale bar indicates distances up to 500 feet. A north arrow is also present.

Wildlife, Birds and Bats

A close-up photograph of a Townsend's big-eared bat, showing its large, prominent ears and brown fur.

The park is excellent habitat for a vast array of songbird species, both resident and migratory. Warblers, sparrows and flycatchers are common here, as are grassland nesting birds, like the western meadowlark. Osprey and eagles hunt for salmon and steelhead in the Clackamas. Typical mammals include Pacific black-tailed deer, coyotes, and a variety of other woodland mammals.

Probably the most famous mammal at Milo is the Townsend's big-eared bat (*Corynorhinus townsendii*), a protected species in Oregon. Over the last decade or so, roosting colonies have reared their young in an old barn at the south end of the park (see map). A one-mile interpretive trail loops near the barn.
